

STEP 1: After display has been built, replace lid on case bottom and secure latches.
If your case has a door, be sure the door and lid handle are facing the rear of your space.
(This will allow you access to the storage area during the show.)

STEP 2: Place your finished counter top over the case lid, being careful to align the hole in the finished top with the handle in the lid.

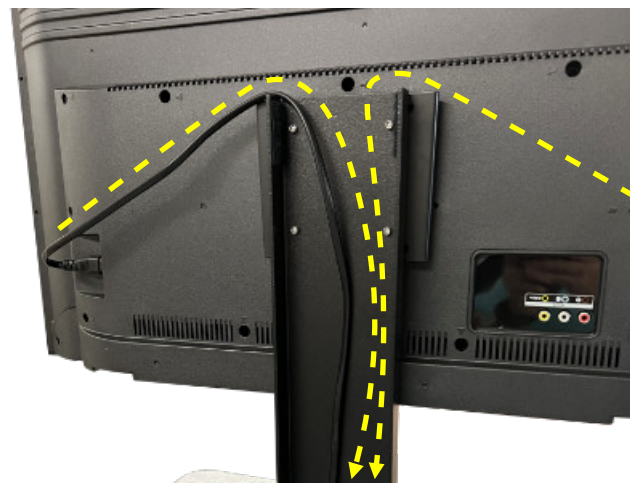

STEP 3: Place monitor arm through lid handle and attach with supplied thumbscrews.

Screws Can Be Found Stored INSIDE the case lid where the screw holes are located

STEP 4: Monitor Installation: Be sure your VESA Plate is connected to your monitor.
Lower monitor VESA plate onto support arm plate

STEP 5: Route any cords through the wire management channel.

STEP 6: Attach the cover for the wire management channel
