

Brite 117x91 Template

Document Size: 123" x 97" (includes bleed) Finished Size: 117"W x 91"H

Please review design guidelines for additional file specs.

---- SAFE AREA 105"x79": Recommended safe area for important text and graphic elements. All elements within this area will avoid the frame and will remain lit.

> Frame: This represents the 2" tubing that creates your Brite frame. Elements in this area will not lit up but will be seen.

Frame Bleed: Elements outside this area may roll to the side of frame and could be hidden from view from certain angles.

Finished Size: This indicates the viewble area of your graphic.

Bleed Area: Elements within this area will not be seen and will be used for stitching.

Images should be 150 dpi at full scale / 300 dpi at half scale.
