Finished Size: 91"W x 91" H
Images should be 150 dpi at full scale / 300 dpi at half scale.
CMYK Color Mode
Please review design guidelines for additional file specs.
-..-n.... SAFE AREA 79"x79": Recommended safe area for important text and graphic elements. All elements within this area will avoid the frame and will remain lit.
$\square$ Frame: This represents the $2^{\prime \prime}$ tubing that creates your Brite frame. Elements in this area will not light up but will be seen.

Frame Bleed: Elements outside this area may roll to the side of frame and could be hidden
from view from certain angles.

Finished Size: This indicates the viewable area of your graphic.
$\square$ Bleed Area: Elements within this area will not be seen and will be used for stitching.
